#CelebratingConnections

45 Years of Celebrating Connections

For **45 Years**, we have championed the independence of aging adults and created connections. Connections are a powerful tool to combat social isolation and create community. The Moments of Joy that bloom when **aging adults connect** with each other and create meaningful friendships. The moment when **caregivers connect** with each other and realize they aren't alone. The moment when **family members** discover new ways to **continue to connect** with their loved ones. The moments when we **connect with our community** with support, compassion and resources. These are the **moments of connection** we are celebrating and we hope to continue to support long into the future.
